CAREER OBJECTIVE

Software Engineer with strong foundations in software development and a growing interest in Artificial Intelligence and Generative AI. Skilled in building scalable applications using Java, Python, JavaScript, React, Next.js, and modern development tools. Passionate about developing AI-driven solutions and solving real-world problems through efficient software engineering practices.

SKILLS

Languages: Java, Python, JavaScript, HTML5, CSS3, SQL

Frameworks/Libraries: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Node.js (Basics)

AI/ML: Generative AI, Prompt Engineering, NLP, LLM Fundamentals

Tools: Git, GitHub, VS Code, Figma, Netlify, Vercel

Core Skills: Data Structures & Algorithms, REST APIs, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Responsive Design

PROJECTS

Nova UI — Scalable CSS Design System [Live](#) | [GitHub](#)

- Developed a modular UI design system with 20+ reusable components, improving development efficiency by nearly 40%
- Implemented design tokens and scalable component architecture for better maintainability
- Built interactive documentation with live previews, improving developer productivity by approximately 30%
- Optimized component rendering and styling consistency, improving UI performance by 25%

GreenGrocery — Full Stack E-Commerce Platform [Live](#) | [GitHub](#)

- Built a responsive e-commerce platform with product catalog, cart management, and checkout functionality
- Implemented Redux state management for real-time updates and seamless user interactions
- Integrated REST APIs for dynamic product handling and asynchronous data fetching
- Enhanced application responsiveness and optimized workflows, reducing interaction time by approximately 35%

AI Resume Analyzer (Python + AI)

- Developed an AI-powered resume analysis system using Python and NLP techniques
- Implemented keyword extraction and semantic skill matching against job descriptions
- Improved resume-job relevance prediction accuracy by approximately 30%
- Reduced manual resume screening effort by nearly 50% through workflow automation

EDUCATION

Accurate Institute of Management and Technology

B.Tech in Computer Science and Engineering

2022–2026

Greater Noida, India

- CGPA: 7.1 / 10
- Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

- Solved 250+ coding and algorithmic problems on Leetcode and Hackerrank
- Built and deployed 5+ web and AI-based projects
- Developed scalable UI systems, improving development efficiency by approximately 40%
- Hands-on experience with Git-based collaborative development practices
- Actively exploring Generative AI and Large Language Model applications
- Strong understanding of software engineering concepts including DSA, DBMS, and REST APIs
